SUMMARY

Results-driven Data Analyst with an Industrial Engineering background and 10+ months of hands-on experience. Built shift-level forecast models enabling same-day production recovery decisions and designed Power BI dashboards that surfaced revenue-critical insights adopted as formal strategic priorities. Proficient in SQL, Python (Pandas, NumPy), Excel, and Power BI, with growing exposure to AI workflow automation and financial data analysis.

WORK EXPERIENCE

Industrial Engineer — Jay Jay Mills, Erode

Apr 2025 – Feb 2026

- Built shift-level production forecast models in Excel enabling same-day corrective planning; consistently closed an average production shortfall of 12% by the following shift through real-time data-driven adjustments.
- Automated operator assignment audits using VLOOKUP and XLOOKUP across 5+ production lines, eliminating error-prone manual cross-checks and significantly reducing daily assignment mismatches.
- Delivered end-of-shift variance analysis reports quantifying root causes of production losses; recommendations adopted by the operations team within the same week, driving gains across 3 bottlenecks.

Data Analyst Intern — Zatheta Algorithms Private Limited

May 2026 – Jun 2026

- Built a 6-page interactive Power BI dashboard to analyze securitisation portfolios, covering Credit Risk Analysis, Recovery Analysis, Collateral Analysis, and Vintage Performance Analysis.
- Created interactive reports using Power BI, Power Query, DAX, and advanced visualizations to improve portfolio monitoring and performance evaluation.
- Delivered meaningful insights through data modeling, KPI tracking, and user-friendly dashboard design.

Data Analyst Intern — Internship Studio

May 2026 – Jun 2026

- Developed a 2-page interactive Power BI dashboard for Retail Sales Data Analysis, providing actionable insights into Customer Response, Revenue Performance, Sales Trends, and Customer Activity.
- Created interactive reports using Power BI, DAX, and Power Query, incorporating KPIs, slicers, and dynamic visualizations to monitor sales performance and customer behavior.
- Transformed retail sales data into meaningful business insights, enabling data-driven decision-making and performance tracking.

PROJECTS

Securitisation Portfolio Data Analysis

Zatheta Internship · SQL · Excel · Power BI

- Data Processing & Quality: Managed and sanitized a 6,000+ record securitisation dataset using advanced SQL — handling missing values, resolving structural inconsistencies, and normalizing schemas to produce a clean analytics-ready data model.
- EDA & Insights: Performed comprehensive EDA in Excel to identify portfolio trends, segment asset performance by vintage and collateral type, and establish baseline KPIs for stakeholder dashboards.
- Visualization & Automation: Developed interactive Power BI dashboards integrating disparate data sources to visualize portfolio health, credit risk, cash flow structures, and ABS performance indicators.

Retail Sales Data Analysis

I Studio Internship · SQL · Excel · Power BI

- Trend & Behaviour Analysis: Performed month-over-month comparative revenue analysis identifying seasonal growth patterns; segmented consumer purchase data by category and frequency to uncover behavioral trends.
- Actionable Reporting: Designed KPI dashboards in Power BI visualizing retail success metrics including revenue growth, conversion rates, and product performance; findings informed future sales strategy.

End-to-End E-Commerce Sales Analysis Dashboard

2024 · Excel · SQL · Power BI

- Cleaned and standardized a 1,000-row raw sales dataset; engineered features using SQL CTEs, multi-table joins, and aggregations to build a unified query-optimized data model.
- Developed 6 custom DAX measures covering revenue growth rate, discount impact, product review scores, and category-level profitability; implemented dynamic slicers and drill-through filters.
- Discovered that the Dresses category generated disproportionately higher revenue relative to its SKU count — insight adopted as a formal strategic priority, driving increased inventory allocation.

SKILLS

Analytics & BI

- Power BI
- DAX
- Excel Pivot Tables
- Drill-through
- Workflow Automation Using AI

Database

- SQL
- CTEs & Joins
- Subqueries
- Aggregations
- EDA

Programming

- Python
- Pandas
- NumPy
- Statistical Analysis

Domain

- Variance Analysis
- Forecast Modeling
- KPI Design
- Root Cause Analysis
- Financial Data Analysis

Emerging

- Data Wrangling
- Mathematics & Statistics

EDUCATION

B.E. Mechanical Engineering

Govt. College of Engineering, Salem

CGPA: 7.68 | 2018 – 2022

12th Standard – 88%

10th Standard – 96.2%

M.A.M. Hr. Sec. School

CERTIFICATIONS

Python for Everybody

Univ. of Michigan · Coursera

Python Data Structures

Univ. of Michigan · Coursera

Data Analytics Internship

Internship Studio · No: ISDTAI3280639 · Jun 2026

ACHIEVEMENTS

- Workflow Automation Using AI for repetitive tasks
- AI Agents & Autonomous Systems

LANGUAGES

English — Professional Proficiency

Tamil — Native / Mother Tongue
